

Compatibility Testing

- We have tested our website across various systems and browsers to ensure compatibility and functionality on different platforms. This testing is an essential part of non-functional testing, as it verifies how well the site performs on various devices and browsers, ensuring a smooth and seamless user experience.

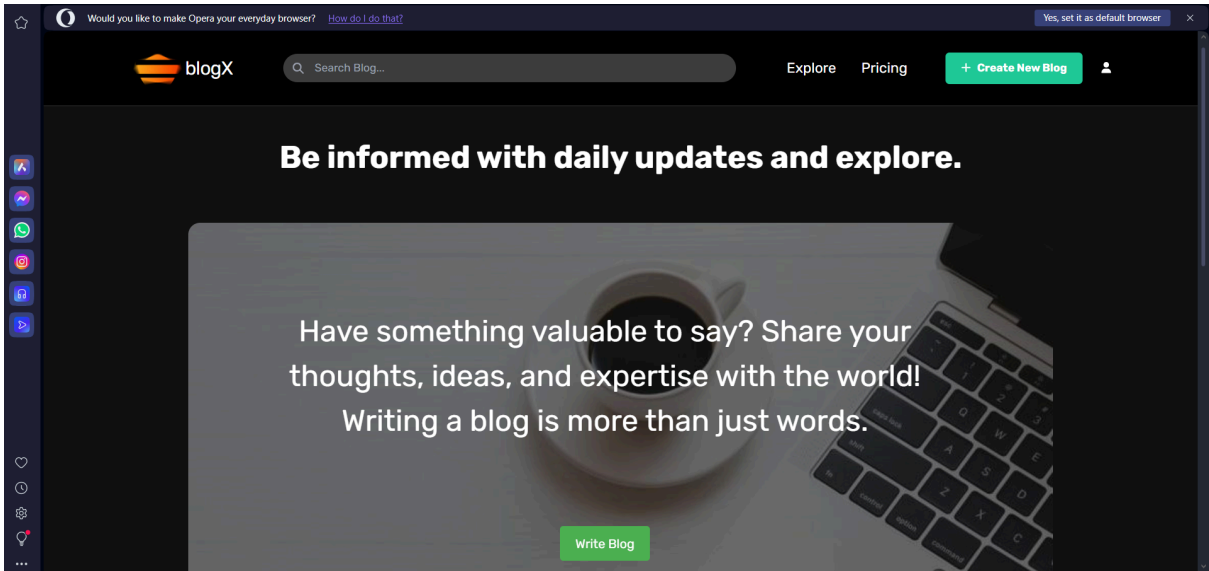

Chrome

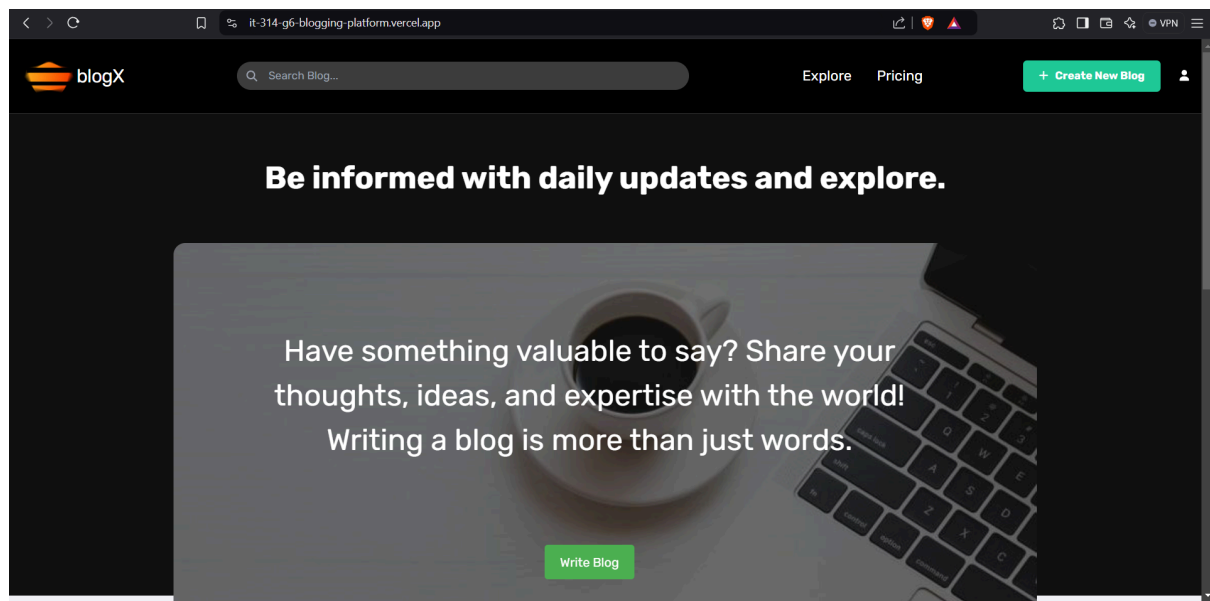

Microsoft edge

Opera

Brave

Conclusion:

The compatibility testing of our website has been successfully completed, and it works flawlessly across various systems and browsers. The website performs as intended, providing a smooth and consistent experience for users on different devices and platforms. This ensures that users can access and interact with the site seamlessly, enhancing its overall reliability and user satisfaction.
